

Doron Linton Prince

Chennai, India | +91 9962220805 | doronprince@gmail.com | github.com/doronprince

Education

Hindustan Institute of Technology and Science

B.Tech, Artificial Intelligence and Machine Learning

Coursework: Deep Learning Architectures, Data Structures & Algorithms, Software Engineering Principles

Chennai, India

Expected 2027

Semester Exchange, Kwangwoon University

AI, Robotics, and Reinforcement Learning coursework

Seoul, South Korea

Fall 2025 – Spring 2026

Experience

Latrics India Private Limited

ML Engineering Intern

Hyderabad, India

May 2025 – Jun 2025

- Accelerated delivery of ML-based software applications across design, coding, and debugging cycles
- Collaborated in an Agile team through daily stand-ups and sprint planning on AI and data science initiatives
- Informed technology stack selection for a new project via comparative research on emerging ML tools
- Authored and maintained technical documentation for models and APIs, improving onboarding speed

Pantech Solutions

AI/ML Intern

Chennai, India

Apr 2023 – May 2023

- Delivered technical specifications for new software features by translating business requirements with senior engineers
- Researched and evaluated emerging AI technologies, presenting findings that influenced the development roadmap

Projects

NexusOps – AI Workforce Management Platform

github.com/doronprince/Nexus-OPS

Python, FastAPI, TensorFlow, JavaScript, Flask – Agentic AI backend for automation and operations workflows.

KSP God's Eye – Agentic RAG Crime Analytics Platform

github.com/doronprince/KSP-DATATHON_MEIKA_GOD-S-EYE

Next.js, Python FastAPI, Agentic RAG, xAI Grok – Translates natural language into SQL to analyze FIR records and surveillance data; built for KSP Datathon 2026.

Project Meka – AI-Powered Student Price-Finding App

github.com/doronprince/Meika_mvp

Next.js, TypeScript, Tailwind CSS – Consumer-facing MVP helping students find the best prices on everyday purchases.

Object Tracking Drone – Computer Vision for Rescue Operations

github.com/doronprince/Drone_CCTV_criminal-identification-and-tracking

Python, OpenCV, C++ – Drone-based CCTV system for real-time identification and tracking, with model training pipeline.

Skills

Languages & Frameworks: Python (expert), Java, C++, JavaScript, TypeScript, Next.js, Flask, FastAPI

ML/AI: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, NLP, Agentic RAG

Tools & Practices: Git, Agile/SDLC, HTML5/CSS3, Tailwind CSS

Other: IoT, Augmented Reality development

Leadership & Activities

Nexus Club, Hindustan Institute of Technology and Science

IoT Tech Lead

Chennai, India

2024 – 2025

- Trained 50+ university students by designing and leading a hands-on, AI-integrated IoT workshop

Hackathon Participant: Smart India Hackathon (SIH), VOIS Global, WTUN, PALS InnoWAH, Skillathon '23
